

# NORTHERN REFUELING MAINTENANCE PTY. LTD.

## SERCO SODEXO– HMAS CAIRNS

### Inspection, Repair and Remediation of Fuel Lines

**Customer:** Serco Sodexo Pty Ltd  
**NRM Customer:** Serco Sodexo  
**Project Value:** \$87,000  
**Period of Project:** September 2013 to January 2014  
**Description of Project:**

In September 2013, Northern Refuelling Maintenance was awarded the contract to conduct the inspection, repair and remediation works of the Navy Fuel Pipe line at Wharf 10 at the Cairns Port.

Major works included in NRM's scope were:

- Remediate pipe line coating to DN250 Fuel Line.
- Adjust all fuel line supports by inserting additional chocks to suit.
- Denso wrap fuel line where it goes under the road entering Wharf 10.
- Replace with suitable intrinsically safe stripping pump.
- Replace stripping pipeline, flanges, backflow prevention devices and sight glasses.

NRM successfully completed these works, taking aboard the considerable challenges of working safely in an environmentally sensitive area while being flexible enough to work with minimum disruption to the traffic of the shipping industry. NRM continues to conduct the ongoing maintenance works for Wharf 10 to ensure the highest quality assurance.
