

NORTHERN REFUELING MAINTENANCE PTY. LTD.

SHELL AVIATION BROOME AIRPORT

Jet A1 Fuel Facility

Customer: Shell Aviation
NRM Customer: Shell Aviation
Project Value: \$500,000
Period of Project: October- November 2013
Description of Project:

In October 2013, Northern Refuelling Maintenance was granted the tender to establish a complete Jet A1 Fuel Facility (both Mechanical and Electrical components) for Shell Aviation in Broome.

Multiple works included in NRM's scope were:

- Installation of tanks, closed circuit sampling system and pump skids
- Supply, fabricate and install all SS Pipe works and supports
- Installation of weatherproof switch boards and new tank gauging panel
- Supply and install warning beacons and warning sounders
- Connection of control panels, float switch and new sewage treatment systems to main switch boards

NRM successfully delivered this project in the logistically challenging remote location, completing it on schedule and to budget.
